PROJECTS

Feathernote (React, Redux, Rails, PostgreSQL) live | github
A RESTful single page web app inspired by the utility and UX of Evernote.com
- Communicates via AJAX requests to keep React components updated in real time
- Incorporates Quill JS in order to achieve a rich-text editing experience
- Uploads user avatar pictures utilizing AWS S3 storage, allowing for a scalable app
- Maintains reliable DOM rendering supported by FLUX architecture and unidirectional data flow

MelodiCode (JavaScript, jquery, HTML)
A customizable musical loop sequencer
- Allows for dynamic melodic creations based on user selection
- Loops through the audio sequencer to hear the melody the user has created
- Displays a sliding bar for tempo adjustments
